CLIENT TESTIMONIALS

Mr Girish Gade
DGM - Marketing,
Devgiri Forging

From 2017, till as of date, we are getting overwhelming support from LEAP team in terms of on-time support as and when we required. LEAP India supported us in a crucial period when we needed less number of boxes than specified. LEAP India portal helps us to understand the current status of returnable material any point of time. We appreciate the LEAP India working culture. Before going for bulk supplies, they initiate an initial sample based on feedback. Only then they will incorporate any changes suggested by the customer and then finally go for bulk supplies. LEAP India provides us with training at various events. Initially, we had started LEAP India only for Ashok Leyland but based on their service we have introduced LEAP to our customer base and now we are working with more than four customers and another four to five customers are under pipeline once we start bulk supplies for returnable packaging. Once again, happy to inform you that we are enjoying a relationship with LEAP India and recommending to our customer too to use their services. ”

Mr Deep Patel
Director,
Biloree Cast India Pvt. Ltd.

I, on behalf of Biloree Cast India Pvt. Ltd., would like to appreciate LEAP India on their sincere efforts that have been shown towards our material handling system. We are pleased by the hassle-free service that LEAP has provided over time. Schedules and dispatches from their end have met our expectations each and every time. Their co-operation has helped us meet our deadlines at our client's end by eliminating unscheduled deliveries. LEAP India has also provided us with a good quality packaging solution that ensured that our products are safe during transportation. We hope these services are never compromised and help us to achieve all our future targets. ”

Mr S.M. Katkar
Manager Sales, Cooper
Corporation Pvt. Ltd.

Cooper Corporation appreciates all of your help in getting our returnable packaging supplies implemented. You've been right here wherever and whenever needed over past few months. From getting studies done to providing the techno-commercial proposals, to trials, to annexure sign-offs right up till implementations and smooth supplies, thanks for your hard work. I am very appreciative of your assistance and am looking forward to continuing to work together. ”
